

EDUCATION

Maharaja Surajmal Institute of Technology (affiliated to GGSIPU)
B.Tech in Computer Science Engineering (Minor: Artificial Intelligence)

Dec 2021 - May 2025
CGPA: 8.540

EXPERIENCE

Freelance Frontend Developer

Hitech Innotech Green Water Pvt Ltd | July 2025 – Dec 2025 | Delhi, India

- Assisted in debugging, troubleshooting UI issues, and coordinating with the third party development team (Web Media Tricks) to resolve technical problems of the company.
- Developed the ThermalBill App for Hitech Innotech Green Water Pvt Ltd, enabling seamless conversion of Tally XML invoices into thermal print format. Led solution design and implementation, saving costs and reducing paper waste.

Frontend Software Engineer INTERN

Coltri Marthub Pvt. Ltd. | Aug 2024 – Oct 2024 | Noida, India

- Contributed to the frontend development of a business website for a small-scale finance company, focusing on responsiveness, usability, and client requirements
- Implemented frontend components using JavaScript and ReactJS, ensuring consistent UI across devices
- Delivered a polished, client-approved live site, boosting digital presence and accessibility for end customers

PROJECTS

ThermalBill – Tally Thermal Print App | [\[Link\]](#)

Developed a browser-based web app using React.js, Tailwind CSS, WebUSB API, and ESC/POS commands to parse Tally XML invoices into editable 80mm thermal printer format.

- Key Features:** Multi-file upload, dynamic print queue, live preview, customizable formatting, and 1–9 copy printing
- Technical Impact:** Achieved 98% parsing accuracy, handled multiple voucher types, and ensured local-only XML processing for data privacy
- Business Impact:** Eliminated TDL integration costs for thermal printing and reduced A4 paper waste for temporary quotation bills

colNsight – Cryptocurrency Dashboard | [\[Link\]](#)

Developed a responsive cryptocurrency dashboard using React.js, Axios, Chart.js, Tailwind CSS, and React Router to track top 100 coins via the CoinGecko API with side-by-side comparisons and performance analysis.

- Key Features:** Real-time price tracking, side-by-side coin comparison, interactive charts, and responsive UI/UX.
- Technical Impact:** Optimized performance with efficient API calls and smooth chart rendering, ensuring a seamless user experience across devices.
- Real-World Impact:** Enables investors to quickly analyze market trends, compare multiple cryptocurrencies, and make data-driven trading decisions.

SKILLS

- Programming:** JavaScript (ES6+), Python, SQL
- Web Technologies:** HTML5, CSS3, React.js, REST APIs
- Tools & Technologies:** VS Code, Postman, GitHub, MySQL

Relevant Coursework

- Data Structures & Algorithms
- Object Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Software Engineering

Certifications

- Prompt Engineering by Infosys Springboard
- Python by Infosys Springboard
- SQL by Hackerrank
- JavaScript Essentials by Cisco
- Oracle University Certified AI Foundations Associate

Extracurricular

- Top 40 out of 1500+ teams - HackWithIndia 2024 (1st-6th April Hackathon)
- Volunteer in ENVA'24 (MSIT Fest)
